

SPV shines at Star City

SPV Group are Specialist Roofing, Cladding, Glazing and Shopfitting & Building contractors who operate both a UK wide and International service for the maintenance and refurbishment of buildings in the commercial sector.

With over 30 years of experience in the industry and an excellent reputation, SPV prides itself in its high quality of service and expertise in delivery.

Now incorporating SPV Roofing & Cladding, SPV Road Carpet Ltd, SPV Windows, SPV Shopfitting & Building, SPV Asset & Facilities Management and SPV Plant, SPV Group offers a multitude of disciplines and services.

SPV specializes in the refurbishment of all Commercial and Industrial buildings including Hotels & Leisure, Retail, Schools, Colleges & Universities, Churches, Hospitals and Sport & Recreational Buildings. SPV are currently working with Star City to assist with the maintenance and refurbishment of all their retail and commercial units. Star City is home to one of Europe's largest cinemas, England's largest indoor adventure golf complex, a purpose built all weather 5 a side football centre, a 22 lane ten pin bowling alley, a brand new Laser Station and a Twin Peaks family climbing centre.

Due to the nature of the existing waterproofing to the central atrium, SPV needed to source a product that was flexible yet exceptionally durable. Ease of application was also a high priority as all the details were either convex or concave in shape. Disruption to the internal areas below was also not an option as this area provides a critical junction in the facility.

SPV therefore called in David Bailey of Alumasc to provide a solution to the complex waterproofing issues due to the shape and design of the atrium.

The Euroroof Impermax QC Liquid Applied Waterproofing system was selected from the extensive range of solutions provided by Alumasc. The Euroroof Impermax QC was chosen because it is a high performance polyurethane, cold applied liquid coating; providing a monolithic fully bonded application ideally suited to the Star City Central Atrium roof area.

The refurbishment of the Star City central Atrium roof area presented certain demands, constant use of the centre required a solution that was not only high performance in its nature but offered very little disruption in its application.

The integration of correct specification, high performance materials and skilled labour ensured the project was delivered successfully in all respects.

Alumasc Exterior Building Products is a leader in the specification of high performance waterproofing and green roof systems. This unrivalled range of BBA certified roofing solutions is backed by extended warranties and underpinned by an extensive project support service.
